

Nebraska Internship Consortium in Professional Psychology

The Nebraska Internship Consortium in Professional Psychology (NICPP) is comprised of outpatient, inpatient, and university agencies in both rural and urban settings in Nebraska. Its mission is to provide integrated, individually tailored and coordinated learning experiences that provide interns with opportunities to: (a) practice and expand on previously held knowledge and learned skills, (b) develop new skills and knowledge, and (c) experience professional growth and development, thus contributing to the emergence of competent, ethical, scientist-practitioner professional psychologists. Each year, approximately 40 interns complete an APA accredited internship at one of the NICPP member sites. Interns are supervised by licensed psychologists, receive ongoing feedback on their mastery of core professional competencies, and select and work towards individualized professional goals. All interns participate in NICPP monthly seminars for broadened peer interactions, to present and receive peer feedback on their cases, to facilitate diversity training, and to receive didactic training in a broad array of topics in professional psychology. Interns take advantage of the consortium's multiple agencies by completing structured instructional visits to each others' sites within NICPP.

Our consortium is strongly committed to advancing diversity in the recruitment and retention of professional staff and interns. We seek to promote a safe and inclusive work environment to allow for reasonable accommodation. Multicultural and diversity considerations are integrated into our monthly consortium days, clinical training, and supervision.
